

ARTHUR BANNISTER

A.A.A Chairperson

Arthur joined the group in 2007, hard to believe. He is another local from Airdrie, with his head in the clouds. A former pupil of Airdrie Academy and now back there as a Science Technician.

He has recently started up a Space Club within the school and already has had the boys from AAA up to their ears in the work at the academy.

We even managed to get 2 astronauts to visit the school, and AAA was on hand to welcome the visitors to the schools

Even more planned with them this year, and if all goes well, an awards for all grant will help them along.

2007 was Arthur's 1st visit to Largs for the Rocketry weekend, he got hooked on water rockets, thanks to Raymond. Now he has made his own launcher for the school and gets to play anytime he wants, and allows the kids sometimes to use it.

After receiving a telescope in 2006 at Christmas, this re-sparked his interest in astronomy and joined AAA March 2007.

And he has never looked back.
